

GROSS DOMESTIC PRODUCT FOR THE THIRD QUARTER OF 2017 (FLASH ESTIMATES)

Gross Domestic Product (GDP) expanded with 3.9% in the third quarter of 2017 compared to the same quarter of the previous year and with 0.9% compared to the second quarter of 2017 according to the seasonally adjusted data.

The Eurostat Handbook on quarterly National Accounts defines the flash estimates as:

„...the earliest picture of the economy according to national accounts concepts, which is produced and published as soon as possible after the end of the quarter, using a more incomplete set of information than that used for traditional quarterly accounts...”

Flash estimates for GDP in the context of general conditions for the preparation of short-term indicators are based on preliminary short-term information (subject to subsequent update and revisions) expert assessments and models for the components of GDP structure, for which direct basic information at the time of calculation is not available.

Flash estimates of GDP for the third quarter of 2017 were prepared within 44 days after the reference period. They are presented in a standard format for publication of quarterly national accounts data - current prices, relative shares of the components in the GDP structure and growth rates as compared to the previous quarter and compared to the same period of the previous year.

According to the Release Calendar, the NSI will prepare and publish preliminary quarterly estimates of GDP for the third quarter of 2017 on December 5th 2017.

GDP in monetary terms, current prices

According to the flash GDP estimates for the third quarter of 2017, the GDP at current prices amounted to 27 336 million BGN (Annex, Table 1).

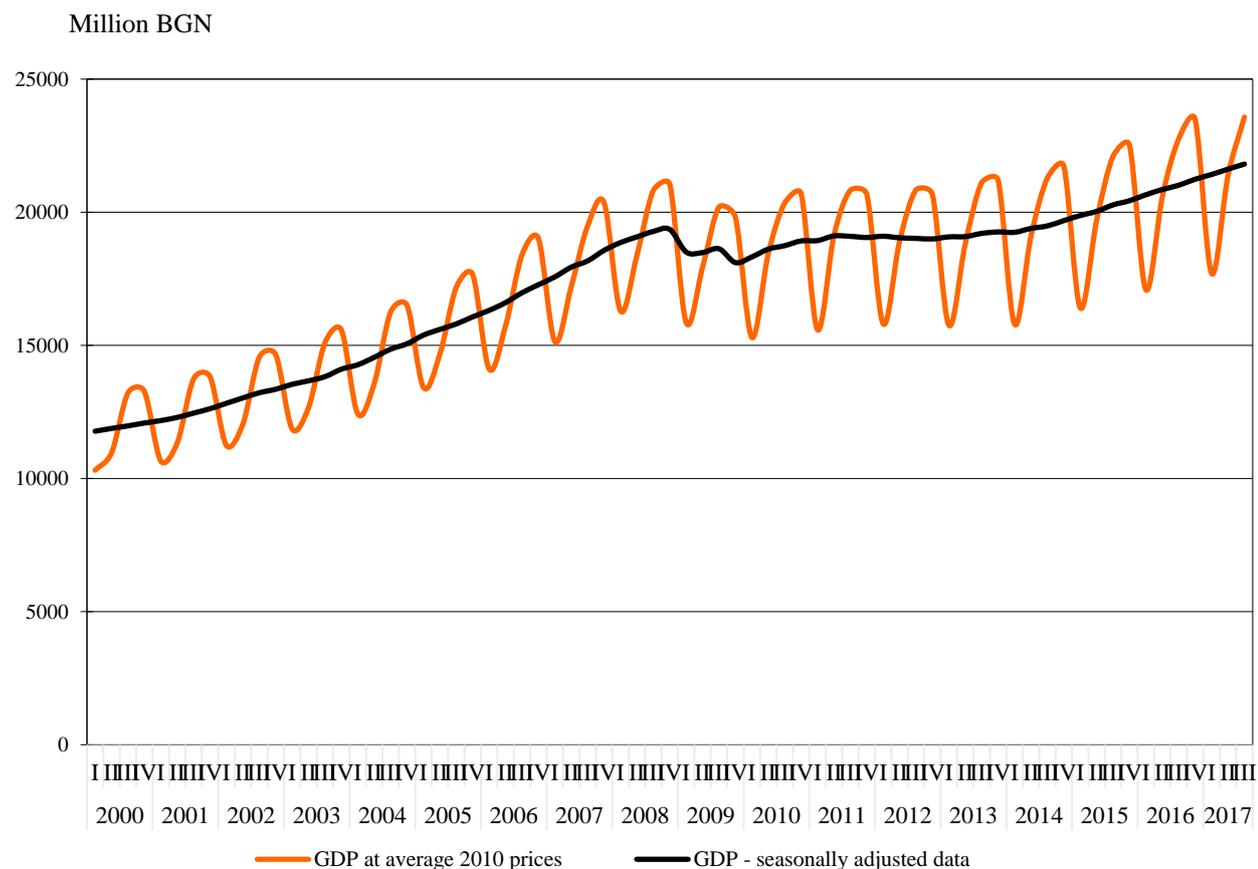

Gross Value Added in the third quarter of 2017 amounted to 23 408 million BGN.

In the structure of GDP by the expenditure approach the largest share has the final consumption (68.9%), which in nominal terms amounted to 18 839 million BGN. In the third quarter of 2017 gross capital formation is 4 990 million BGN and has a share of 18.3% in GDP. The external balance (exports minus imports) has a positive sign.

Growth rate of GDP, total and by components

Figure 1. GDP by quarters for the period 2000 - 2017, at average 2010 prices

Quarter-on-quarter growth rates

According to the seasonally adjusted data¹, the GDP growth rate in the third quarter of 2017 is 0.9% compared to the previous quarter (Annex, Table 2). GVA increase in the third quarter of 2017 is 0.5%.

According to the flash estimates by final expenditure the GDP growth in the third quarter of 2017 is determined by increase of the final consumption with 1.1% and exports of goods and services with 3.2%.

¹ Seasonal adjustment of statistical indicators in the NSI is organized in accordance with [ESS Guidelines on Seasonal Adjustment](#). The seasonal adjustment of GDP data is made with the TRAMO/SEATS algorithm applied. The set of variables for seasonal adjustment covers gross value added, gross domestic product and its components from the expenditure side.

Growth rates on annual basis

The third quarter of 2017 GDP at seasonally adjusted data increased by 3.9% compared to the same quarter of the previous year. Gross value added increased also by 3.9%.

As regards the expenditure components of GDP, the final consumption registered a positive economic growth by 4.6%. Gross fixed capital formation increased by 4.2% compared to the same quarter of the previous year. Exports and imports of goods and services increased by 4.4% and 6.2% respectively.

Annex

Table 1

Gross Domestic Product, Third Quarter of 2017¹
(Flash estimates)

	Third quarter of 2017	
	Value at current prices - Million BGN	Relative share in GDP - %
1 Gross Value Added by economic sector:	23408	85.6
2 Adjustments	3928	14.4
3 Gross Domestic Product (1 + 2 = 4 + 5 + 6 + 9)	27336	100.0
by final use components:		
4 Final consumption	18839	68.9
5 Gross capital formation	4990	18.3
6 Balance (exports - imports)	3507	12.8
7 Exports of goods and services	19355	70.8
8 Imports of goods and services	15848	58.0
9 Statistical discrepancy	0	0.0

¹ Seasonally unadjusted data.
