

INDUSTRIAL PRODUCTION INDICES IN MAY 2021¹

According to the preliminary data in May 2021 the Industrial Production Index², seasonally adjusted³, decreased by 1.2 % compared to April 2021.

In May 2021 the working day adjusted⁴ Industrial Production Index rose by 16.5% in comparison with the same month of 2020.

Figure 1. Industrial Production Indices (2015 = 100)

¹ May 2021 data are preliminary. The final data on Industrial Production and Turnover Indices for April 2021 can be found on the NSI website: http://www.nsi.bg/en.

² Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

³ Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

⁴ Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

Monthly changes

In May 2021 as compared to April 2021, the seasonally adjusted Industrial Production Index fell in the electricity, gas, steam and air conditioning supply by 2.7% and in manufacturing by 1.1%, while the production rose in the mining and quarrying industry by 3.3%.

The most significant decrease in the manufacturing was seen in other manufacturing by 25.8%, in the manufacture of other transport equipment by 18.2%, in the manufacture of motor vehicles, trailers and semi-trailers by 14.5% and in the manufacture of leather and related products by 12.7%. Major increase was reported in the manufacture of chemicals and chemical products by 11.3%, in the manufacture of other non-metallic mineral products - by 7.7%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 6.8% and in the manufacture of tobacco products by 6.6%.

Figure 2. Changes of Industrial Production Indices compared to the previous month (Seasonaly adjusted)

Annual changes

On annual basis in May 2021 Industrial Production Index calculated from working day adjusted data rose in the manufacturing by 18.7%, in the mining and quarrying industry by 14.0%, and in the electricity, gas, steam and air conditioning supply by 9.0%.

In the manufacturing more considerable increase compared to the same month of the previous year was registered in the manufacture of motor vehicles, trailers and semi-trailers by 93.6%, in the manufacture of computer, electronic and optical products by 48.6%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 47.7% and in the manufacture of machinery and equipment n.e.c. by 43.1%. Major decrease was seen in the manufacture of beverages by 29.6%, in the manufacture of wearing apparel by 18.1%, and in the manufacture of leather and related products by 8.3%.
