Methodological notes

The survey ‘Crèches’ is an exhaustive survey carried out by the National Statistical Institute annually. Detached crèches as well as groups in kindergartens are covered.

The sources of data are detached crèches and groups in kindergartens. Data on personnel, places in crèches and the number of children, as well as their distribution by age, are collected.

Crèches are set up to support families in raising children up to the age of three years and to ensure their normal physical and mental development in accordance with the Law on Health and Ordinance No. 26/18.11.2008 of the Minister of Health. Crèches are organizationally distinct structures, where medical and other specialists raise, educate and train children aged from three months to three years.

Groups for children aged between 3 months and 3 years could be opened at daily and weekly kindergartens as the organization of work there does not differ from the work of detached crèches.

Additional statistical information and data from the Survey on crèches are available in IS Infostat (https://infostat.nsi.bg/infostat/pages/module.jsf?x_2=60) as well as on the NSI’s website (www.nsi.bg), section ‘Health’.
