

## PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS, JUNE 2023

In June 2023, compared to the previous month, for the production of energy products, the largest increase is observed in liquefied petroleum gases - by 33.3%. The largest decrease is registered in solid fuels - by 24.2%.

For the deliveries of energy products, an increase is observed only in transport diesel - by 9.1%. The largest decrease is registered in liquefied petroleum gases - by 20.9%.

### Production of energy products

In June 2023, compared to May 2023, a decrease is reported for the production of:

- liquefied petroleum gases - by 33.3% to 8 thousand tonnes;
- electricity - by 17.7% to 2 963 GWh;
- transport diesel - by 7.6% to 268 thousand tonnes.

A decrease is reported for the production of:

- solid fuels - by 24.2% to 794 thousand tonnes;
- motor gasoline - by 10.1% to 134 thousand tonnes.

No change for the production of natural gas (Annex, Table 1).

Compared to the same month of the previous year, a decrease is reported for the production of:

- solid fuels - by 66.6%;
- natural gas - by 50.0%;
- electricity - by 26.5%;
- motor gasoline - by 14.6%;
- transport diesel - by 11.8%;
- liquefied petroleum gases - by 11.1%.

### Deliveries of energy products

In June 2023, compared to May 2023, an increase is reported for the deliveries of transport diesel - by 9.1% to 227 thousand tonnes.

A decrease is reported for the deliveries of:

- liquefied petroleum gases - by 20.9% to 34 thousand tonnes;
- solid fuels - by 16.1% to 786 thousand tonnes;
- electricity - by 7.0% to 2 300 GWh;
- natural gas - by 3.3% to 145 million m<sup>3</sup>;
- motor gasoline - by 2.2% to 45 thousand tonnes (Annex, Table 2).

Compared to the same month of 2022, an increase is reported for the deliveries of:

- transport diesel - by 7.6%;
- liquefied petroleum gases - by 3.0%.

A decrease is reported for the deliveries of:

- 
- solid fuels - by 67.5%;
  - motor gasoline - by 22.4%;
  - natural gas - by 19.4%;
  - electricity - by 4.7%.

## Methodological notes

The survey on energy products is conducted every month in accordance with Regulation (EC) No. 1099/2008 of the European Parliament and of the Council of 22 October 2008 on energy statistics and its amendments. The survey aims to submit information on the production and inland deliveries of the main energy products - electricity, solid fuels, natural gas and petroleum products. The reporting units are producers, importers and exporters of energy products. Production and deliveries of energy products are the main observed indicators.

Data series can be found on the NSI website: [www.nsi.bg](http://www.nsi.bg), section Energy/Data.

### Solid fuels

*Production* - includes Hard coal, Lignite and Solid fuels from coal. Producers report quantities calculated after any operation for the removal of inert matter.

*Deliveries* - quantities delivered to the internal market. They are equal to the total of the deliveries to the different types of consumers: producers' own use, main activity power stations, coking plants and patent fuel plants, industry, iron and steel industry and others.

*Since 1.01.2017, Brown coal briquettes have been excluded from the monthly survey.*

### Petroleum products

*Production* - includes production of finished products at a refinery or blending plant.

*Deliveries* - wholesale deliveries to the domestic market of finished petroleum products from producers and importers/exporters.

Deliveries of petroleum products are defined as: primary product receipts + gross refinery output + recycled products – refinery fuel + imports – exports – international marine bunkers + interproduct transfers – products transferred – stock changes.

### Natural gas

*Production* - includes all dry marketable production within national boundaries, including offshore production. Production is measured after purification and extraction of NGLs and sulfur. Excludes extraction losses and quantities reinjected, vented or flared. Includes quantities used within the natural gas industry; in gas extraction, pipeline systems and processing plants.

*Deliveries* - total natural gas, distributed for the internal market, including own use and losses.

Data are presented in million cubic meters assuming reference gas conditions 15°C and 101.325 kPa. To convert quantities from cubic meters at 20°C to cubic meters at 15°C - according to the reporting requirements of Regulation (EC) No. 1099/2008 of the European Parliament and the Council on energy statistics, we use a conversion factor of 0.98294.

### Electricity

*Production* - includes produced electricity from Thermal power plants, Nuclear power plants, Hydropower plants, Pumped storage plants and electricity, obtained from wind generators and solar panels.

*Deliveries/Total net consumption* - the sum of the net produced electricity and net import, reduced by the amount used for pumped storage.

Annex
