

## INDUSTRIAL PRODUCTION INDICES IN JUNE 2019<sup>1</sup>

According to the preliminary data in June 2019 the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, decreased by 1.9% as compared to May 2019.

In June 2019 the working day adjusted<sup>4</sup> Industrial Production Index fell by 3.6% in comparison with the same month of 2018.

**Figure 1. Industrial Production Indices (2015 = 100)**

<sup>1</sup> June 2019 data are preliminary. The final data on Industrial Production and Turnover Indices for May 2019 can be found on the NSI website: <http://www.nsi.bg/en>.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

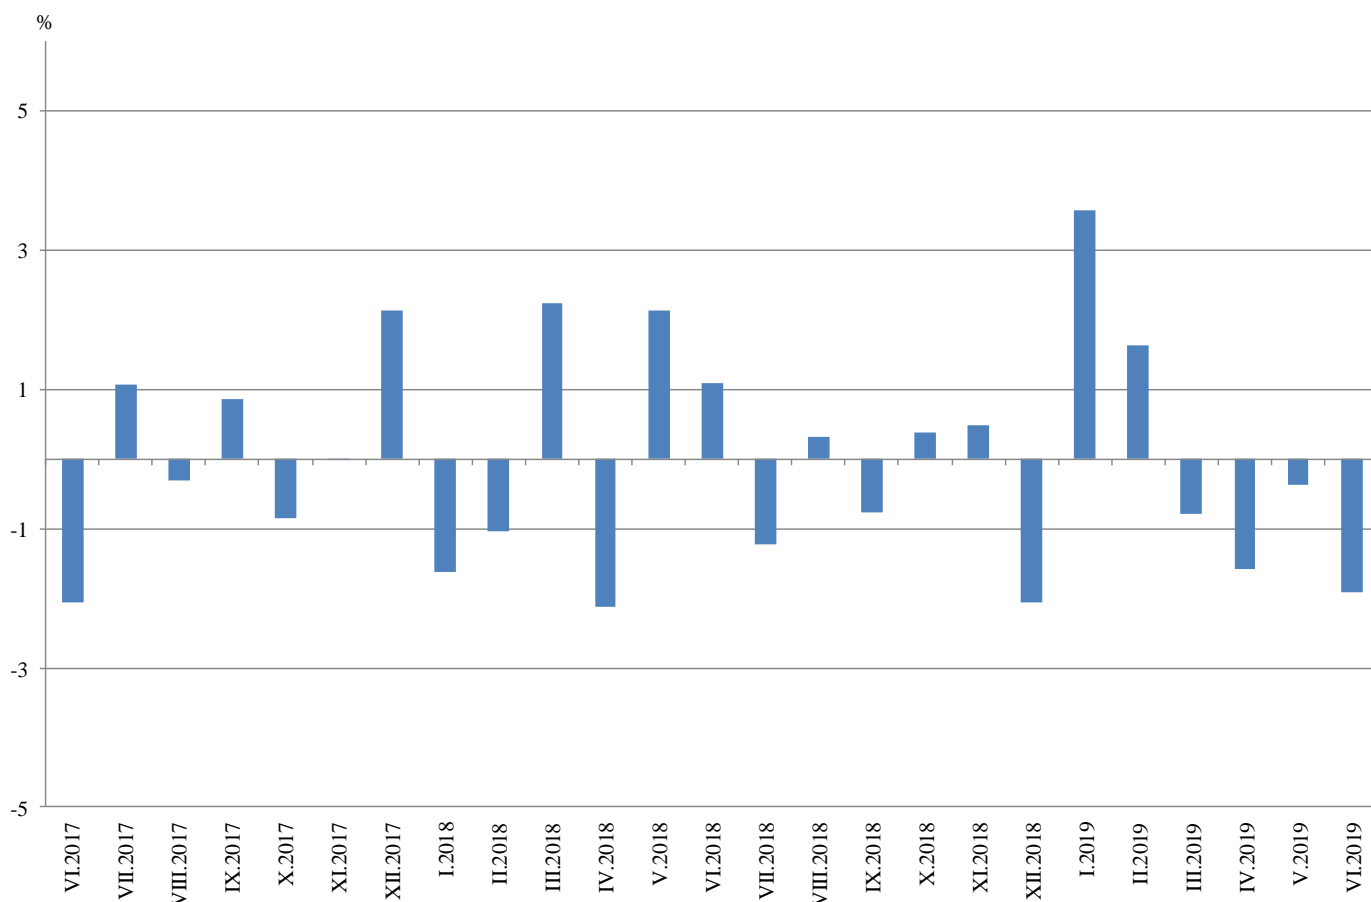

## Monthly changes

In June 2019 as compared to May 2019, the seasonally adjusted Industrial Production Index decreased in the mining and quarrying industry by 12.5%, in the electricity, gas, steam and air conditioning supply by 1.3% and in the manufacturing by 1.2%.

The most significant production decreases in the manufacturing were registered in the manufacture of tobacco products by 33.4%, in the manufacture of leather and related products by 13.8%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 9.8%, in the manufacture of paper and paper products by 8.1%. Major increases were seen in the manufacture of computer, electronic and optical products by 9.5%, in the manufacture of textiles by 8.9%, in the repair and installation of machinery and equipment by 6.3%, in the manufacture of fabricated metal products, except machinery and equipment by 4.8%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month  
(Seasonally adjusted)**

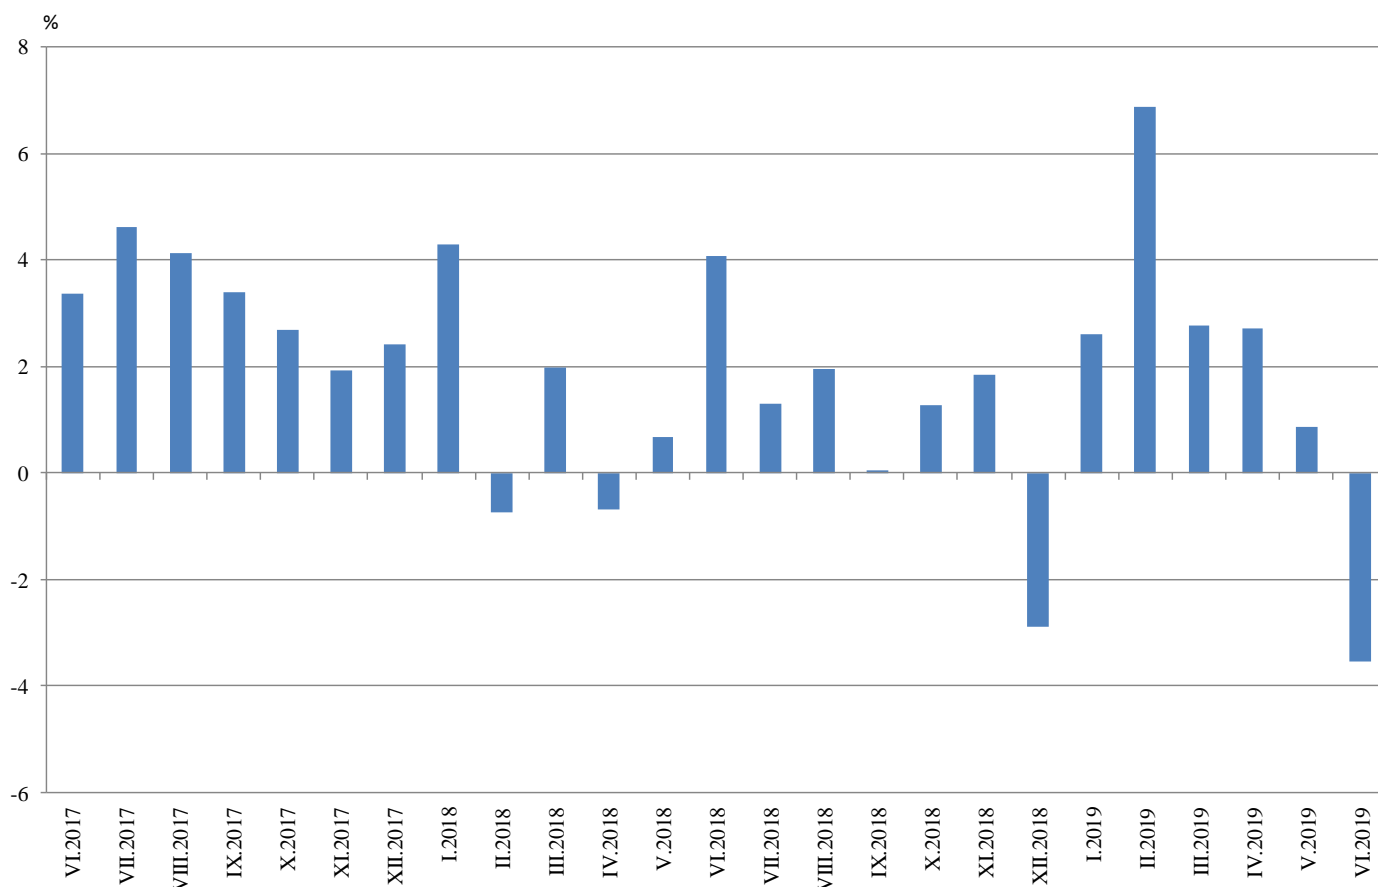

## Annual changes

On annual basis in June 2019 Industrial Production Index calculated from working day adjusted data went down in the mining and quarrying industry by 20.0%, in the electricity, gas, steam and air conditioning supply by 4.6% and in the manufacturing by 1.7%.

In the manufacturing, the more considerable decreases compared to the same month of the previous year were registered in the manufacture of tobacco products by 47.1%, in the manufacture of basic metals by 21.0%, in the manufacture of wearing apparel by 11.8%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 10.4%. Important increases were seen in the printing and reproduction of recorded media by 15.2%, in the other manufacturing by 10.7%, in the manufacture of computer, electronic and optical products by 10.3%.
