

## INDUSTRIAL PRODUCTION INDICES IN MAY 2020<sup>1</sup>

According to the preliminary data in May 2020 the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, decreased by 0.1% as compared to April 2020.

In May 2020 the working day adjusted<sup>4</sup> Industrial Production Index fell by 16.1% in comparison with the same month of 2019.

**Figure 1. Industrial Production Indices (2015 = 100)**

<sup>1</sup> May 2020 data are preliminary. The final data on Industrial Production and Turnover Indices for April 2020 can be found on the NSI website: <http://www.nsi.bg/en>.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

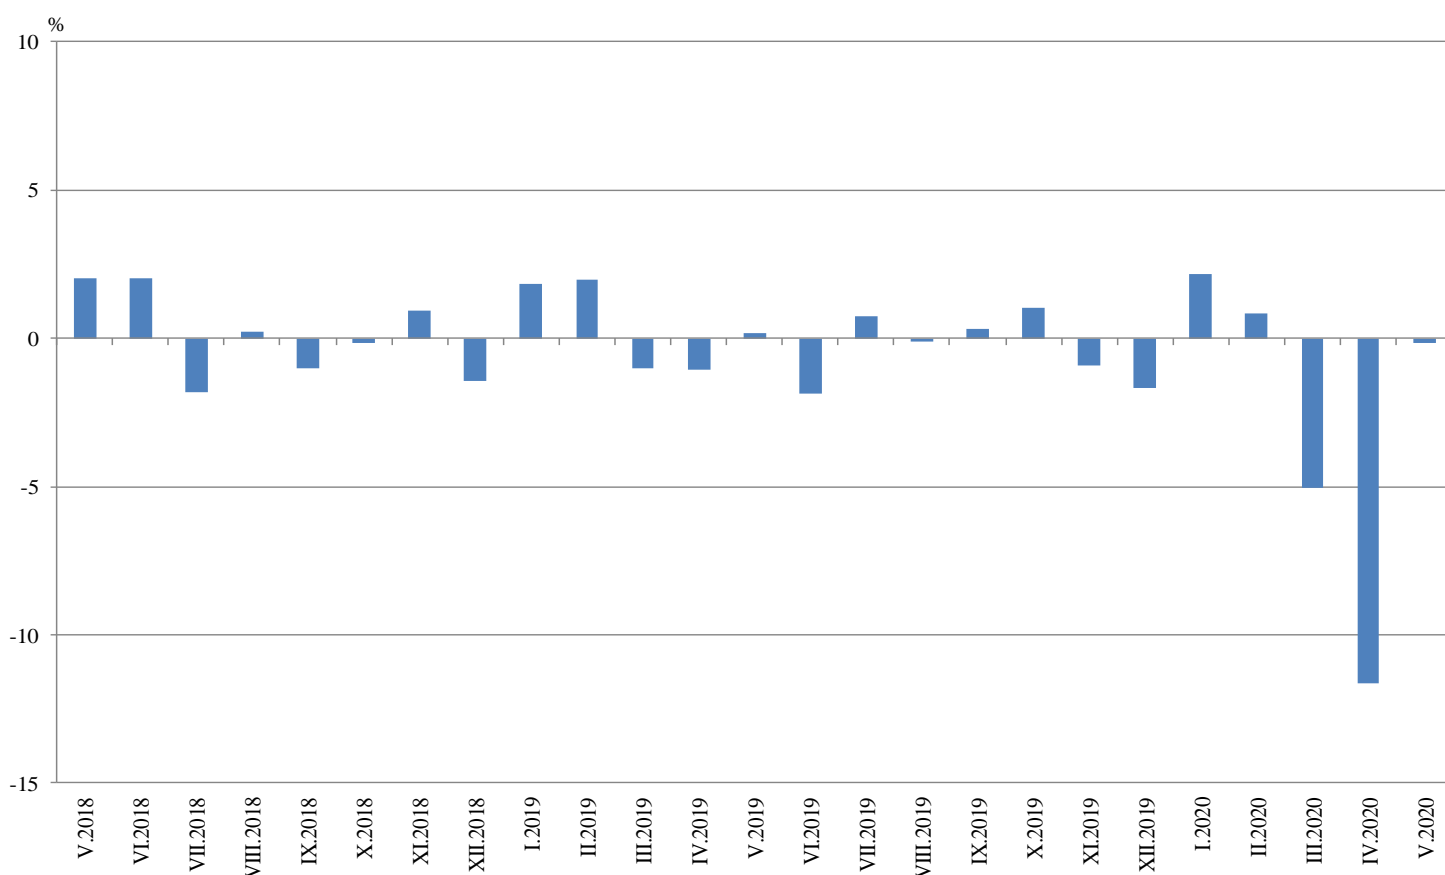

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

## Monthly changes

In May 2020 as compared to April 2020, the seasonally adjusted Industrial Production Index went down in the mining and quarrying industry by 5.8% and in the electricity, gas, steam and air conditioning supply by 3.7%, while the production rose in the manufacturing by 1.1%.

The most significant production increases in the manufacturing were registered in the manufacture of motor vehicles, trailers and semi-trailers by 52.2%, in the manufacture of wearing apparel by 18.9%, in the manufacture of textiles by 18.7%, in the manufacture of furniture by 14.1%. Important decreases were seen in the manufacture of tobacco products by 18.6%, in the repair and installation of machinery and equipment by 16.1%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 6.4%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month  
(Seasonally adjusted)**

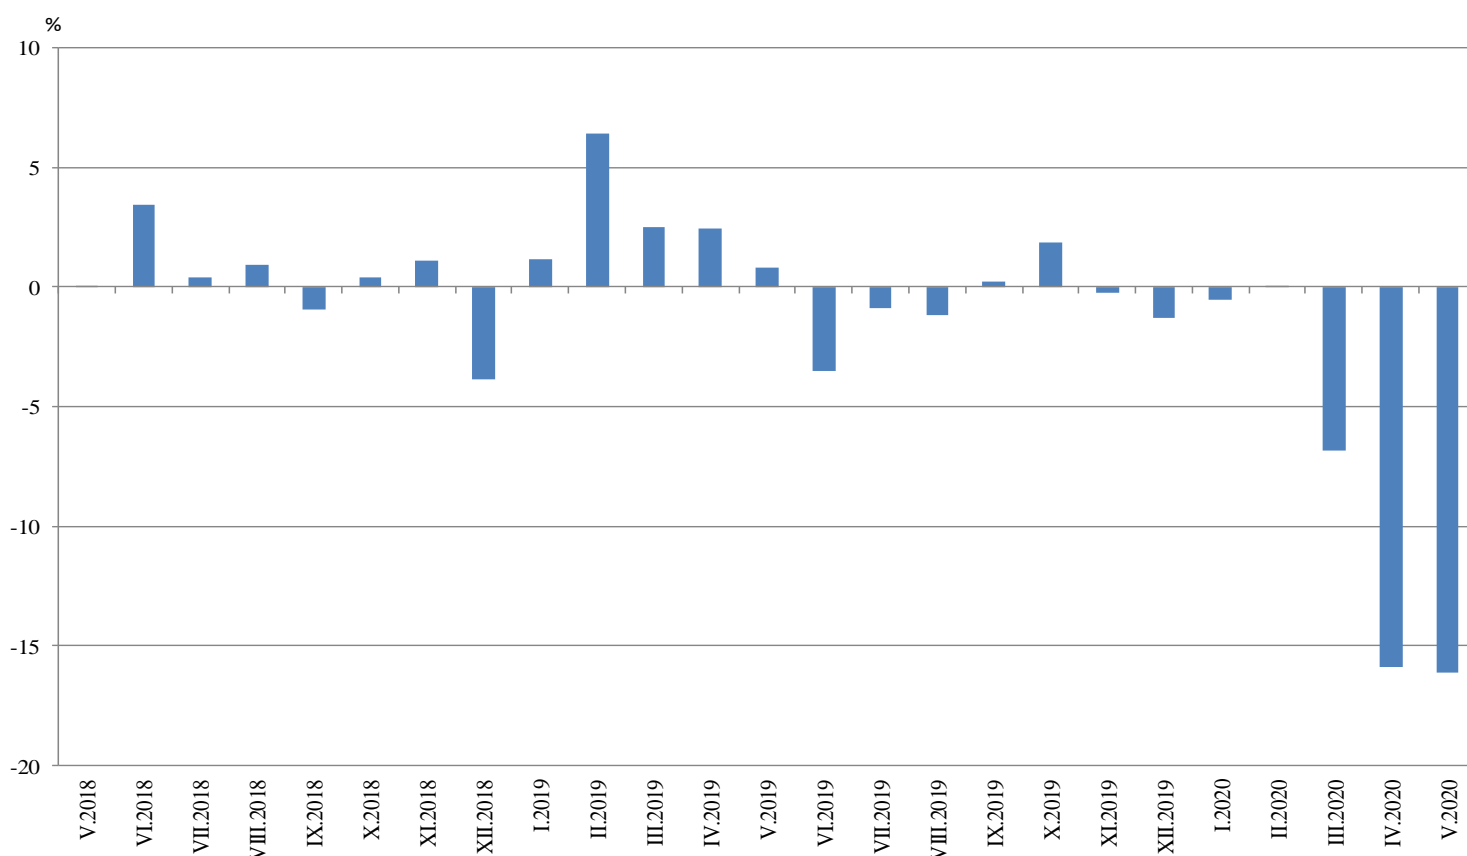

## Annual changes

On annual basis in May 2020 Industrial Production Index calculated from working day adjusted data fell in the manufacturing by 16.9%, in the electricity, gas, steam and air conditioning supply by 15.5% and in the mining and quarrying industry by 8.2%.

In the manufacturing, the more considerable decreases compared to the same month of the previous year were registered in the manufacture of motor vehicles, trailers and semi-trailers by 60.6%, in the manufacture of tobacco products by 46.2%, in the other manufacturing by 44.4%, in the manufacture of machinery and equipment n.e.c by 39.3%. Major increases were seen in the manufacture of basic metals by 16.2%, in the manufacture of textiles by 8.1%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 5.1%.
