

## **INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2012**

### **Consumer price index (CPI)**

The **consumer price index** in November 2012 compared to October 2012 was 99.9%, i.e. the monthly inflation was -0.1%. The inflation rate since the beginning of the year (November 2012 compared to December 2011) had been 3.8% and the annual inflation in November 2012 compared to November 2011 was 3.9% (Figure 1 and Annex, Table 1).

The annual average inflation, measured by CPI, in the last 12 months (December 2011 - November 2012) compared to the previous 12 months (December 2010 - November 2011) was 2.8%.

### Figure 1. Inflation measured by CPI by months

In November 2012 compared to the previous month the prices of goods and services in the main consumer groups changed as follows:

- Food and non-alcoholic beverages a decrease of 0.3%;
- Alcoholic beverages and tobacco an increase of 0.1%;
- Clothing and footwear an increase of 1.3%;
- Housing (rentals, maintenance and repair), water, electricity, gas and other fuels an increase of 0.4%;

- Furnishings, household equipment and routine maintenance of the house a decrease of 0.4%;
- Health a decrease of 0.2%;
- Transport a decrease of 1.7%;
- Communications the prices remained at the level of the previous month;
- Recreation and culture an increase of 0.1%;
- Education the prices remained at the level of the previous month;
- Restaurants and hotels an increase of 0.4%;
- Miscellaneous goods and service a decrease of 0.2%.

## Harmonized index of consumer prices (HICP)

The **harmonized index of consumer prices** in November 2012 compared to October 2012 was 99.8%, i.e. the monthly inflation was -0.2%. The inflation rate since the beginning of the year (November 2012 compared to December 2011) had been 2.5% and the annual inflation in November 2012 compared to November 2011 was 2.7% (Annex, Table 2).

The annual average inflation, measured by HICP, in the last 12 months (December 2011 - November 2012) compared to the previous 12 months (December 2010 - November 2011) was 2.3%.

In terms of HICP in November 2012 compared to the previous month the prices of goods and services in the main consumer groups changed as follows:

- Food and non-alcoholic beverages a decrease of 0.2%;
- Alcoholic beverages and tobacco an increase of 0.1%;
- Clothing and footwear an increase of 1.2%;
- Housing (rentals, maintenance and repair), water, electricity, gas and other fuels an increase of 0.3%;
- Furnishings, household equipment and routine maintenance of the house an increase of 0.1%;
- Health a decrease of 0.1%;
- Transport a decrease of 1.3%;
- Communications a decrease of 0.1%;
- Recreation and culture a decrease of 0.1%;
- Education the prices remained at the level of the previous month;
- Restaurants and hotels an increase of 0.3%;
- Miscellaneous goods and service a decrease of 0.1%.

## Price index of a small basket (PISB)

The **price index of a small basket** in November 2012 compared to October 2012 was 99.9% and the overall increase since the beginning of the year (November 2012 compared to December 2011) had been 104.9% (Annex, Table 3).

In November compared to the previous month the prices of goods and services in the small basket for the 20% households with the lowest income, changed as follows:

- Food products a decrease of 0.2%;
- Non-food products a decrease of 0.1%;
- Services an increase of 0.2%.

## Methodological notes

The consumer price index (CPI) is the official measure of inflation in the Republic of Bulgaria. It measures the total relative price change of goods and services used by households for private (non-production) consumption and it is calculated by applying the structure of the final monetary consumption expenditures of the Bulgarian households. The main source of information for the expenditures is the household budget survey in the country. CPI in year t is calculated with the expenditures structure of year t-1.

The Harmonized Index of Consumer Prices (HICP) is the comparable measure of inflation across EU Member states. It is one of the criterions of price stability and for readiness of Bulgaria to join the euro-zone. HICP, as well as CPI, measures the total relative price change of goods and services. Both indices are calculated using the same basket of goods and services, but differ with respect to the used weights. HICP is calculated through the use of weights, which reflect the individual and the collective consumption of all households (incl. institutional and foreign households) on the economic territory of the country. The main source of information for HICP weights is the national accounts data. HICP in year t is calculated with the weights of year t-2.

The **Price Index of a Small Basket (PISB)** is a measurement of the relative average price changes of 100 socially useful and vital for the living goods and services. The weights of this index reflect the expenditures of the 20% lowest income households. The source of weights information is the Households Budget Survey in the country. This index in year *t* is calculated with the weights of year *t*-1.

The **chain** consumer price indices measure the price change in current month compared to the previous month. The chain consumer price indices are used a measure of **monthly inflation**.

The **12-month** consumer price indices measure the price changes having occurred between the current month and the same month of the previous year. The 12-month consumer price indices are used a measure of **annual inflation**.

Consumer price indices **over December of the previous year** measure the accumulated changes in prices of the current month with respect to December of previous year. Consumer price indices over December of the previous year are used as measures of the **inflation since the beginning of the year**. In December of each year, the 12-month index is equal to the index over December of the previous year.

The **annual average** consumer price indices measure the average price change during the 12 months of the current year compared to the average price change during the 12 months of the previous year. The annual average consumer price indices are used as a measure of the **annual average inflation**.
