Бележка. Населението към средата на 1935 и към началото и средата на годините 1936, 1937, 1938 и 1939 е изчислено чрез естествения прираст на населението и емигрантите (без емигрантите граждани). Имигрантите не са взети под внимание, понеже броят на възвръщаните и извънземни имигранти се почти покрива.

\* Цифрите въ графи 3, 4 и 5 представляват резултатите от редовните преброявания въ края на предшестващата година.
